What is the FPFX Tech 1 Step Futures Assessment Plan?

The 1 Step Futures Assessment Plan is a streamlined, monthly subscription-based futures trading program built for traders who want a direct path from Assessment to Funded trading. Instead of moving through multiple challenge phases, traders complete one Assessment account and, after passing the applicable requirements, transition to a Funded account.

The structure is simple: reach the growth target, keep the best trading day within 33.33% of total profits, and stay above the Max Trailing Loss. Because there is no listed minimum trading day requirement, a consistent trader can complete the Assessment in as few as 3 trading days. Once funded, eligible gains may be requested subject to the same 33.33% consistency standard, the required non-withdrawable profit buffer, review, and the 80% trader profit split.

Key Features of the 1 Step Futures Assessment Plan

1. **One-step Assessment -** Trade a single Assessment account. When the growth target and consistency requirement are satisfied, the trader may complete KYC and the Trader Agreement to receive a Funded account.
2. **Fast path to funding and payout eligibility -** The 33.33% consistency standard allows up to one-third of total profit to come from the best trading day, which supports a faster path without requiring a long minimum trading period.
3. **Funded account profit split -** After funding, eligible gains generated in an active Funded account may be requested subject to the 80% trader profit split, funded consistency requirement and the required non-withdrawable profit buffer.

Plan Size		$ 25,000	$ 50,000	$ 75,000	$ 100,000	$ 150,000
Plan Rules	Growth Target (Evaluation)	$ 1,500	$ 3,000	$ 4,500	$ 6,000	$ 9,000
		6%				
	Daily Drawdown	None				
	Max Drawdown	$ 1,500	$ 2,000	$ 2,498	$ 3,000	$ 4,500
		6%	4%	3.33%	3%	3%
	Trailing Max Drawdown Type	Intraday Equity HWM				
	Consistency Requirement	33.33%				
Funded Account	Non-Withdrawable Buffer	6%	4%	3.33%	3%	3%
	Profit Split	80%				
Timing	Minimum Trading Days	None				
	Max Time (Evaluation)	30				
	Inactivity Time	30				
Exposure Limits	Contract Limits (Standard / Micro)	1 / 10 Contracts	3 / 30 Contracts	6 / 60 Contracts	9 / 90 Contracts	12 / 120 Contracts

TRADING RULES | FREQUENTLY ASKED QUESTIONS (FAQ):

How do I achieve a Funded account?

The Assessment phase begins once you purchase an account. To qualify for a Funded account, you must reach the applicable growth target within 30 days, remain above the Max Trailing Loss, and keep your consistency ratio at or below 33.33%. After the Assessment requirements are met, you will be asked to complete KYC and sign the Trader Agreement. Once approved, the Funded account is generated.

When do I get the payout?

Assessment gains are not withdrawable. Payout eligibility begins after you receive a Funded account and generate eligible gains in that Funded account. A payout request is subject to the funded 33.33% consistency requirement, the non-withdrawable profit buffer, payout review, and the 80% trader profit split.

There is no listed initial withdrawal delay or subsequent withdrawal delay for this plan, but withdrawals are not permitted from breached accounts. The account and subscription must be active and all payout requirements must be satisfied at the time the request is reviewed.

How does the monthly subscription work?

Billing begins on the initial purchase date and renews monthly while the account remains active and has not been breached. The monthly subscription remains active in both the Assessment and Funded phases. A subscription may end if the account is breached or if the customer manually cancels the subscription. Manual cancellation will end the subscription and will also result in the account being breached. There are no refunds for partial month subscriptions. Final subscription pricing may vary by platform; current pricing is specific to DXFutures.

What is the Consistency Requirement**?

We use a Consistency Requirement to discourage profit targets or payout eligibility being reached through one unusually large trading day. The calculation is: (best trading day PnL / total PnL) x 100.

A lower value means profits are generated more consistently across multiple trading days. A higher value means profits are concentrated on fewer trading days. For this plan, the consistency ratio must be 33.33% or lower in both the Assessment phase and the Funded account.

Because the maximum allowed ratio is 33.33%, a trader cannot complete the requirement with the entire profit target coming from fewer than 3 profitable trading days. The Consistency Requirement is not a breach rule by itself, but it must be satisfied before a trader can pass the Assessment or request a payout from the Funded account.

Example 1: On a $100,000 account with a $6,000 growth target, a trader earns $2,000 per day over 3 profitable trading days. The best day is $2,000 and total profit is $6,000, so the consistency ratio is 33.33% ($2,000 / $6,000). The consistency requirement is met.

Example 2: On a $100,000 account with a $6,000 growth target, a trader earns $3,000 on one day and $1,000 on each of 3 other days. Total profit is $6,000, but the best day is $3,000, so the consistency ratio is 50% ($3,000 / $6,000). The account is not breached, but the trader is not yet eligible to pass or request a payout. To bring the ratio down to 33.33%, total profit would need to increase to approximately $9,000 while the best trading day remains $3,000 or lower.

What is the Profit Buffer?

The Profit Buffer applies to the Funded account. It is the required amount of profit that must remain in the account and cannot be withdrawn. The buffer is not a fee and is not deducted from the account. It simply remains in the account after a payout, so the account retains a cushion above the Max Trailing Loss.

Only profits above the required buffer are potentially withdrawable. The 80% trader profit split is applied to the withdrawable amount after the buffer is excluded.

Example: On a $100,000 Funded account, the required buffer is $3,000. If account equity is $103,000, there is no withdrawable profit because the account has only reached the required buffer. If account equity is $104,000, then $1,000 is potentially withdrawable before the 80% split, which would equal an $800 trader payout if all other payout requirements are met. If account equity is $106,000, then $3,000 is potentially withdrawable before the 80% split, which would equal a $2,400 trader payout if all other payout requirements are met.

Do I lose my account if I do not meet the Consistency Requirement?

No. The Consistency Requirement is not a breach rule by itself. However, it must be met before you can pass the Assessment or request a payout from the Funded account.

What is a Profit Target?

The Growth Target is the profit amount you must reach during the Assessment phase to qualify for a Funded account, subject to all other Assessment requirements. Assessment profits are not withdrawable.

Is there a Daily Loss Limit?

There is no Daily Loss Limit, but traders must always stay within the Max Trailing Loss.

How do you calculate the Max Drawdown (Maximum Trailing Loss)?

The Max Trailing Loss is calculated from the account equity high-water mark reached intraday. It is not based only on end-of-day balance. If your equity reaches a new intraday high, the Max Trailing Loss trails upward from that high by the applicable max loss amount. Once the trailing loss reaches the account starting balance, it locks at the starting balance and does not move above it.

Example 1: On a $100,000 account, the Max Trailing Loss is $3,000. At the start, the breach level is $97,000. If intraday equity rises to $101,200, the new breach level is $98,200. That remains true even if equity later falls or the account closes the day below $101,200.

Example 2: If the same account reaches an intraday equity high of $103,000, the breach level becomes $100,000. The account must remain above that level even though the breach level is now at the original starting balance.

Example 3: If the account later reaches an intraday equity high of $104,500, the breach level does not continue rising above $100,000. Once the Max Trailing Loss locks at the starting balance, it remains there unless the account is breached.

Can I reset my account if I lose it?

No. You will need to purchase a new account if you breach it for any reason.

Can I hold positions over the weekend?

No. All positions must be closed and all open orders cancelled at 1555 CST each weekday.

What is a Futures contract?

A futures contract represents a standardized amount of an underlying asset. For example, one E-mini S&P 500 futures contract (ES) represents $50 times the index price, while one crude oil (CL) contract represents 1,000 barrels of oil. See the product table in Appendix A.

How do I complete the CME market data attestation requirements?

DXFutures: You will need to log into the platform to attest to the market data feeds agreement and confirm your status as Non-Professional. As part of the data attestation process, you may be asked to fill in personal information, including your job title and employer name. These fields are mandatory but not validated. You may enter values to complete the process.

Note: We cannot support CME Professional data subscriber status. All users must qualify as Non-Professional per CME rules.

What are the Market Data Fees?

Market data fees cover the cost of accessing real-time price data from the exchanges. These fees are included in your purchase.

What is the 30-Day Maximum Time rule?

In the Assessment phase, you have a maximum of 30 days to meet the passing requirements. Otherwise, the account will be considered breached.

Is there a breach for inactivity in the Assessment or Funded account?

Yes. The inactivity period is 30 days for all phases you must place an executed trade once every 30 days to retain the account.

Can I pause the inactivity timer at any account phase?

No. We cannot pause the inactivity timer at any account phase.

Do I need to complete KYC or sign a trader contract to start trading in a Funded Futures Plan?

You will be required to complete our Know Your Customer (KYC) process and sign our Trader Agreement after passing the Assessment phase and prior to receiving a Funded account.

What happens if I do not pass KYC?

If you do not pass the KYC process, your account will be closed.

Do we manipulate the pricing or executions you receive in your Funded Futures accounts?

No. We operate at arm's length with the liquidity providers and exchanges. All market pricing and trade executions are provided by third parties and are not changed or modified by us. Additionally, we do not mark up transaction costs by adjusting bid-offer spreads, markups, markdowns, commission charges, or swaps.

Who is the counterparty to my trades?

During the simulated phases, trades are executed against the liquidity provided by your trading platform and are designed to closely mimic real-market pricing and execution. Once you receive your live funded account, pricing and execution will come directly from the exchange or exchanges on which you trade.

Am I subject to any position limits?

Yes. Each account is subject to a maximum contract limit based on its starting balance. This limit represents the total number of open contracts you may hold at any one time. Contract limits are enforced across all products. Once the maximum allowed exposure is reached, no additional positions may be opened until existing exposure is reduced. Contract limits use a 1:10 ratio, where one E-mini contract is equivalent to ten Micro contracts.

For example, a $50,000 account is limited to 3 standard E-mini contracts or 30 micro contracts in total. This limit applies regardless of product type, and exposure is aggregated across all open positions.

OTHER GENERAL QUESTIONS:

What Countries are accepted?

Subject to compliance with applicable laws and regulations, traders from all countries, excluding OFAC listed countries, can take part in our program, unless otherwise limited at the Company's discretion.

What is the minimum age requirement to be part of your program?

You must be at least 18 years of age, or the applicable minimum legal age in your country, to purchase a Futures Assessment account.

Where do I track the progress of my account?

Upon purchasing a 1 Step Futures Assessment plan, you will receive access to a trader dashboard where you can monitor your account. The dashboard is updated in near real time as we calculate your account metrics. It is your responsibility to monitor your breach levels.

What Platforms can I trade on?

DXFutures ONLY. Accounts can access the platform via web or through the Apple iOS mobile app, available here: https://apps.apple.com/us/app/gooeytrade-futures-by-dx/id6739489964. Third-party trading platforms are not supported on DXFutures.

What products can I trade?

Traders are allowed to trade Futures products only in this program, listed on the following exchanges: CME, COMEX, NYMEX and CBOT. The full list of supported Futures products is listed in Appendix A of this document.

Am I required to trade the front-month futures contract?

Traders must trade the front-month contract for each product, as it has the highest liquidity and open interest. For example, in March, the correct contract for the ES E-mini S&P 500 product is the March (H) contract, not July (N) or September (U). Trading out-month contracts is prohibited and may result in the loss of your account. Always ensure you are trading the active front-month contract listed on the exchange.

To identify the most active front-month futures contracts, you can use CME Group's Product Slate, which provides detailed information on available contracts, including their current front-month status: https://www.cmegroup.com/markets/products.html?

What are the trading hours for Futures products?

Trades can be placed starting at the 1700 CST CME Globex Open and can be held until 1555 CST. On non-holiday trading days, all open positions and orders will be closed or cancelled at 1555 CST.

What happens if I do not close the trade?

Positions will be closed for you during regular trading days at 1555 CST. Trades cannot be held over weekends.

Holiday Trading Hours:

During holiday trading hours, auto-liquidation may not occur at the half-time market close, and the trader is responsible for closing positions.

- Please pay careful attention to market hours around holidays and shortened weeks.
- Failure to close positions before the market closes may result in the loss of the account, whether it is a Funded Futures account or another account phase.

Do your accounts charge commissions?

Assessment and Funded Futures accounts receive the same pricing and commissions as charged by the Liquidity Provider or exchanges to other, self-funded retail trading accounts. Please see Appendix A for per-instrument commission charges.

Can I use an Automated Strategy?

Subject to our policy on Prohibited Trading as described below, you can trade using an automated strategy.

What is the policy on Prohibited Trading Activity?

You are prohibited from using any trading strategy that is expressly prohibited by the Company or the Liquidity Providers it uses. Such prohibited trading ("Prohibited Trading") shall include, but not be limited to:

- Exploiting errors or latency in the pricing and/or platform(s) provided by the Liquidity Provider or exchange.
- Utilizing non-public and/or insider information.
- Front running of trades placed elsewhere.
- Trading in any way that jeopardizes the relationship that the Company has with a Liquidity Provider or exchange, or may result in the cancelling of trades.
- Trading in any way that creates regulatory issues for the Liquidity Provider or exchange.
- Utilizing any third-party strategy, off-the-shelf strategy, or strategy marketed to pass challenge accounts.
- Attempting to arbitrage a funded account with another account with the Company or any third-party company, as determined by the Company in its sole and absolute discretion.
- No Gambling Permitted: Traders are expected to adhere to responsible risk management practices. This includes carefully considering the risks associated with position size, trade duration, and hedging strategies. Taking excessive risks, such as utilizing maximum leverage to open large positions with the hope of reaching profit targets through a single price movement, is strictly prohibited. Please refer to the Terms and Conditions for the full Prohibition of Gambling Practices language.
- If the Company detects that your trading constitutes Prohibited Trading, your participation in the program will be terminated and may include forfeiture of any fees paid to the Company. Before any Trader receives a funded account, the trading activity of the Trader may be reviewed by both the Company and the Liquidity Provider or exchange to determine whether such trading activity constitutes Prohibited Trading. In the case of Prohibited Trading, the Trader shall not receive a funded account.
- Compliance with CME Group Rules: All trading activities must adhere to CME Group rules and regulations.
- The Company reserves the right to disallow or block any Trader from participating in the program for any reason, in the Company's sole and absolute discretion.

To view all Prohibited Uses, please review our Terms and Conditions here:
https://dashboardanalytix.com/client-terms-and-policies/

Can I trade during News Events?

Our futures program does not prohibit trading during news events. However, traders must exercise heightened caution due to the increased volatility and reduced liquidity that often accompany such events.

Traders are solely responsible for staying informed of scheduled economic news releases and managing their positions accordingly.

How will I see charges on my Statement?

Charges come across in the name of Dashboardanalytix.com.

How are taxes handled?

When trading an account for our firm, you are treated as an independent contractor. As a result, you are responsible for any and all taxes on your gains.

How are affiliates credited?

Affiliates are credited for referrals when a user creates an account using a link or discount code provided by the Affiliate.
